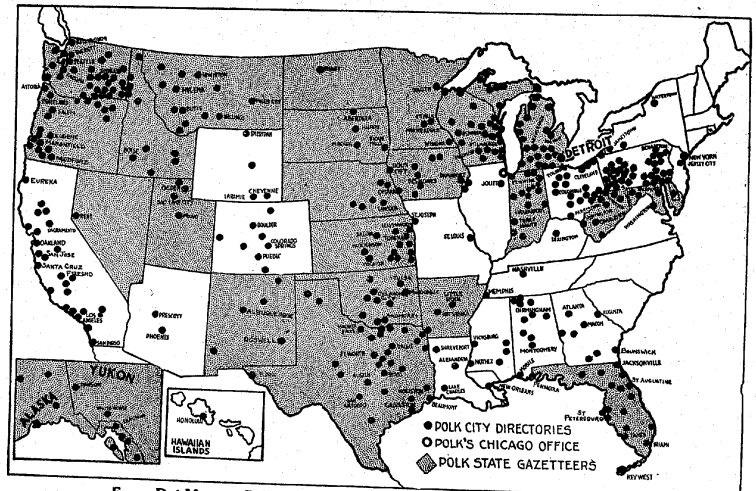
Centuries *of* Use Emphasizes *the* Vital Importance *of the* CITY DIRECTORY



Every Dot Means a Polk City Directory—Shaded States Have Polk Gazetteers

As a work of reference the modern City Directory is on a par with the Dictionary and the Encyclopedia. Centuries before the telephone came into existence the City Directory had earned its place as an essential to the social and commercial activities of the people.

It gained in prominence and prestige as the relations of man with his neighbor became more complex.

The first printing from movable type in the English language was done in London in 1477. Newspapers appeared in the early part of the seventeenth century—as did also the first real City Directory, which was published in London, England, in 1640. Prior to this there was a publication hardly called a Directory. It was issued in 1595 during the reign of Queen Elizabeth, and entitled "The Names of all such Gentlemen of Accompts as were residing within the City of London."

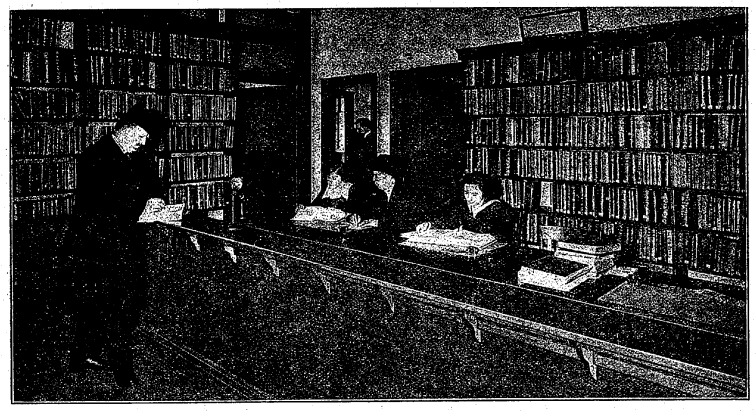
Paris had its first Directory in 1691; Liverpool, England, in 1766; Dublin, Ireland, 1770; Edinburgh, Scotland, 1773; Hamburg, Germany, 1787; Philadelphia, Pa., 1785; New York City, N. Y., 1786, followed by Boston, Mass., 1789, and Baltimore, Md., in 1796.

One of the difficulties of Directory publishing in the early period was the lack of house numbers. Because of this many houses were known as "The Black Bear," "The White Swan," "The Six Golden Lights"—or on such and such a road next door to the goldsmith's.

It was not until 1800 that house numbering became general. Difficulties had to be overcome gradually until the present system was evolved. Directory publishers have always been—and still are—of great assistance to the authorities in the house numbering problem.

Today the City Directory occupies a place peculiarly its own. It supplies in one volume names, addresses, facts and information about a city not to be had elsewhere. It is as necessary to the progress and development of a city generally as anything naturally would be which deals with such a fundamental—as the citizens themselves.

R. L. Polk entered the Directory business in 1870. The growth and expansion from a then small, single publication to an organization national in scope, is indicated by the more than 500 City Directories, State Gazetteers and Special Directories published by R. L. Polk & Co.



How to use a
Polk Directory Library

There is one in your city and in other important cities over the Country

You can make a trip to almost any City in the Country in a few minutes by consulting the City Directory of that City, which is on file in the Polk Directory Library.

For the City Directory is the City, complete in one condensed well-indexed volume. What you can find in your own City Directory you can find in the City Directory of another City—if it is a Polk City—or the publication of some other member of the Association of North American Directory Publishers.

Today the modern City Directory occupies a place peculiarly its own. It supplies in one volume facts and information about a city not to be found elsewhere.

USE THE DIRECTORY LIBRARY

When you know a firm's or a person's name and the city where located, but cannot remember the street address:

When you cannot recall a concern's style of name or have forgotten some person's initials:

When you want the names and titles of City, County or State Officials in another part of the country:

When you need the names of banks, real estate men, a lawyer or another business group or individual in another city:

Or innumerable other kinds of information found only in City Directories—the nearest Directory Library is at your service.

Directory Libraries are the natural result of a commercial and social need anticipated and fulfilled by R. L. Polk & Co. and affiliated Directory Publishers.

EMERGENCY SERVICE

In emergencies Directory Libraries have been of inestimable worth to persons in need of the name of a Doctor, Hospital or Cemetery in some nearby or distant locality. Traveling salesmen and tourists find them especially helpful.

Directories of both large and small cities are kept on file for quick reference. That they are valued is evident by the numerous letters of commendation which are continually reaching us.

Every day all over the country, thousands of people are consulting these Libraries, and aside from their personal assistance the Directories in the collection are good advertising for their respective cities and their industries.

Likewise the individual advertisers in the various books profit by the increased distribution which their Directory Advertising and Classified References receive through this Library plan, which places Directories throughout the country to direct those who need them. In other words, it nationalizes a service which formerly was only local in its use.
